student government

—Larry Puckett
president, Student Senate

The two major student organizations at any college or university are the student government for the academic and civil life of students and the student union for the social and recreational activities. Sometimes the separate functions of these organizations are not clearly understood.

At Bryan the student government is headed by a Student Senate of sixteen persons who represent various sectors of the student body. One male and one female student from each of the four classes, one non-resident student, the four class presidents, and the president, vice-president and secretary of the student body hold seats on the Senate. All members of the Senate must have a 2.5 current grade average and a 2.2 cumulative average (on a 4.0 scale).

The Senate meets at least once each week in order to keep abreast of the changing college scene and function accordingly. One major responsibility of the Student Senate is the appointing of students to all faculty-student committees. These committees deal with every phase of student life from the academic to the social and enable students to actively enter in to the discussions and decision-making areas that pertain to them.

The first aim of the Senate is to "engender the bond of Christian love among members of the student body." Secondary aims are "to represent the student body before the administration and to represent the administration before the student body." Voicing student opinion, desire, and need on committees and through the Senate helps make the primary aim of the student government at Bryan a reality. Students gain an understanding of administrative processes through this involvement, and therefore, may more adequately represent the administration before the student body. Cooperation and understanding on this level engender love and Christian propriety in all other levels of student life.

The Student Union assumes a major role in keeping the morale of students high through a program of wholesome and beneficial social activities. Student Union representatives from each of the four classes meet at least once each week to provide leadership in planning and budgeting a well-rounded activity schedule which will both interest and satisfy student needs. Concerts, movies, skating parties, Sadie Hawkins Day and Hobo Day on campus, and trips to baseball games in Atlanta are all included in the Student Union calendar to make college life and books a bit more bearable.

The task of the Student Union like that of the Student Senate is mainly one of service to the student body. These two organizations work closely together to supply the students of Bryan College with the kind of organizational stimulation which meets our needs—all within the framework of the high ideals of this institution which truly seeks to honor "Christ Above All."

I have as president of the Student Senate this year seen this system of organization really work. There are many examples, but I think a prime example would be the construction of the new Student Center. Students were placed on the committee of administrators and planners which decided how the construction was to be done in order to make the new area as comfortable and practical as possible.

With the sealing off of that area during the construction process, the Student Union and Senate were called upon by the administrators to relocate the ping-pong tables, pool table, color TV and the college snack bar. This was done in such a way that all the displaced student facilities and appliances were still accessible. In spite of the shortage in available space and the everyday inconvenience of construction, the social activity has not suffered and morale has remained high as students are able to maturely look forward to the benefits of this project while disregarding any temporary discomfort. Students feel very much a part of total progress of the college because of the role allowed them in both the planning and development stages of the new Student Center.

The Christian Service Association, known as CSA, at Bryan College is exactly what our name implies, a service association. We are the servants of Christ, seeking to present the gospel to the unsaved and uplift those who are already Christians. Ephesians 6:6-7 reminds us that as the servants of Christ we must be sincere, doing what we know is the will of God from our heart, not in order to please our fellow men, but as unto the Lord.

CSA has a unique ministry in that we are afforded the opportunity to teach Bible classes each week for one-half hour in six Dayton area elementary schools. Thirty-five Bryan students are involved in the program which includes the presentation of a Bible story, prayer, singing, and getting to know these children personally. The Bible teaching ministry has grown to the point where we now have an outreach to thirty-one classes with approximately 800 children. What an opportunity to present the gospel, and we certainly thank God for this unusual chance to reach these children for Christ.

The CSA teachers truly show a love for the children they work with, as illustrated by the request of one principal who asked if he could have the same three teachers back this semester because he noticed how much the children had grown to love their teachers and how much love and concern our teachers showed for the children.

Another aspect of our work is through gospel teams, which minister to local area church groups during the school semester and also in individual witnessing efforts during vacation periods. One of our teams recently had a very fruitful meeting in a boys' reformatory near Pikeville. At this meeting nineteen boys made a profession of faith in Jesus Christ. In a letter to one of our team members, one of those boys wrote, "You just don't know how great I feel knowing that all my sins are forgiven."

The work of the gospel teams up to this point has been preparation also for a ministry at the Pacific Garden Mission in Chicago, Illinois, during the spring vacation in March, when two teams are scheduled to aid in personal counselling with the men of skid row and to share faith in Jesus Christ with anyone who may be contacted. We are trusting the Lord to save many souls during this time in Chicago and are counting on the prayerful support of our fellow students, faculty and friends. We realize that if we are to reach souls, no matter if it is here in Dayton or in Chicago, or across the seas, we must always depend on the Holy Spirit for our strength.

CSA is a service organization indeed, but we are always aware of our main purpose—service to our Lord and Savior Jesus Christ.

could be new. . . it's up to you!

—Charles Westgate, president of the Alumni Association

You have heard of the China Wall and the Iron Curtain. Perhaps you have never been exposed to the Concrete Bleacher that exists at Bryan College. We have tried for years to dissolve the conflict which puts these barriers between mankind and true peace. Money, men, and machines have been deployed to break down the Iron Curtain and the China Wall but little has been done about the Concrete Bleacher at Bryan College. There students are tortured daily as they attempt to listen to men who desperately try to gain their attention in the matter of truth and righteousness. But also, who can hear the still small voice when the body is crying in anguish and the mind is pre-occupied, coping with pain and fatigue. Some have called it gymnocide, others, seaticide; but whatever you call it, it is truly speakercide (the death of many a good speaker).

We need your help to alleviate the horrible situation. Steps have been taken and plans made so that if you will cooperate at this time, the Concrete Bleacher can become the Rudd Memorial Chapel. We need \$37,000 more to meet our commitment of \$100,000 in the \$500,000 total. Your gift, great or small, can change a disinterested student into a missionary, teacher, or preacher if he but once has the opportunity to hear God's men with undivided attention.

Do your part today by giving a gift to the Rudd Memorial Chapel in care of your alma mater—Bryan College, Dayton, Tennessee, 37321.
